DUAL MOTOR SYNC SYSTEM

Heritage
Collection
GL-358XXL

The new Dual Motor Sync System, now standard on the GL-358 XL and XXL, is an industry-first product enhancement from Pride®.

Traditional dual inline motor systems have a natural tendency to fall out of sync over time, requiring regular manual calibration. Pride's Dual Motor Sync System actively works to keep the inline motors synchronized, ensuring long lasting quality and performance.

To see a video demonstration of the Dual Motor Sync System, visit <http://www.pridemobility.com/liftchairs/dualmotorsync>
